

Mobile Mammography Van

A breast x-ray, known as a mammogram, is the best way to find cancer in its earliest stages—up to two years before it can be felt. If breast cancer is detected early, 90 percent of women can be treated successfully!

All women age 40 or older should have a mammogram every year. At the Sentara RMH Funkhouser Women's Center, we offer 3D mammography both onsite and on our mobile mammography van.

MARK YOUR CALENDARS!

the Sentara RMH screening mammography mobile unit, now offering 3D mammography, will be at

EMU
Wednesday
May 6, 2026

Registration required. To make an appointment, please call Sentara Patient Scheduling at **540-689-6000**.
